

What if you could

# Mitigate flood damage?

Develop safe, resilient and cost-effective stormwater systems with our comprehensive modeling solution.

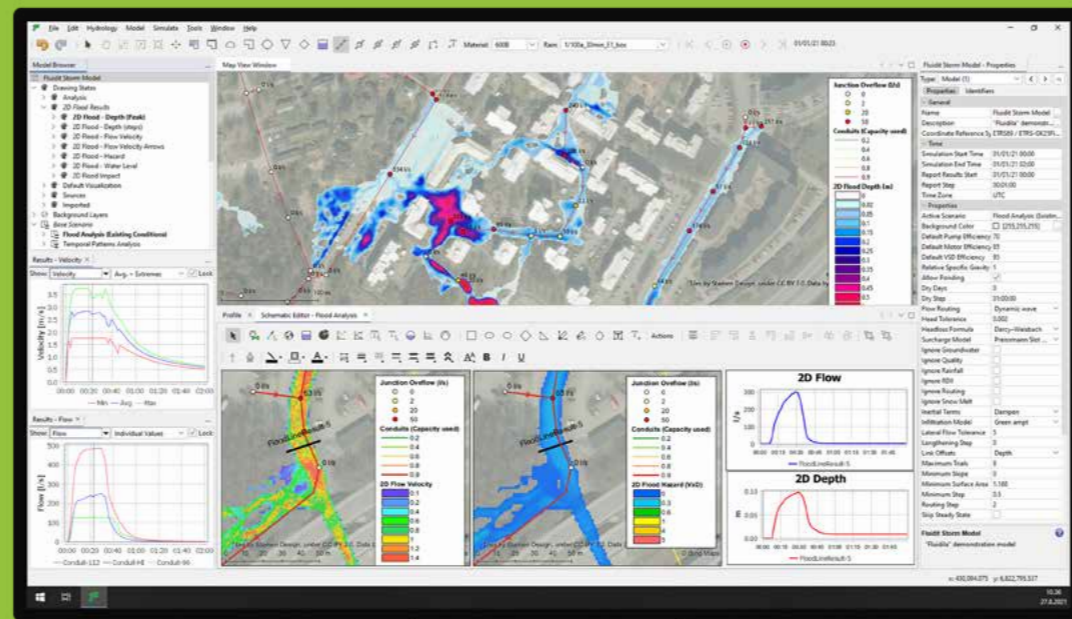

Let cities thrive

# Fluidit Storm™

Urbanization disrupts the natural water cycle and flow paths as catchments are developed and landscapes altered. These transformations can lead to flash flooding, prolonged dry periods and water quality degradation. Modelling provides critical insights into the planning of stormwater systems and effective solutions to the challenges.

Fluidit Storm offers engaging tools for developing stormwater networks and analyzing flood risks. It effectively combines the robust SWMM modelling of 1D networks and ultra-fast CAFlood 2D simulations with powerful scenario and visualization tools. Spend your time smarter with Fluidit Storm.

- Simulate catchment hydrology, snowmelt and pollutants
- Ultra-fast 1D-2D hydraulic simulations and DEM editing
- Unlimited number of components, scenarios and simulations
- Compatible with other modelling software via SWMM and GIS files

- Inheritable scenario tree with comparison tools and analysis
- Highly flexible import and export tools
- Fully-customizable and automatically updating schematics
- Cutting-edge software architecture

Easy model building with designer-friendly tools

GIS layers, online databases and DEM Manager

Manage, edit, query and visualize all system data

Stormwater system design and analysis

Hydrological simulations for catchment analysis

Quick 1D-2D flood analysis (SWMM+CAFlood)

Fully programmable for your specific needs

Create your own features as plugins

Perfect for educational purposes

FOR DESIGNERS

FOR UTILITIES, MUNICIPALITIES AND CONSULTANTS

FOR SCIENTIFIC PURPOSES

## Rental License

- Simple all-inclusive monthly fee

---

- Easily scalable to customer needs

---

- Includes access to support, updates and resource pages

---

## Perpetual License

- For customers who procure software as an investment

---

- After procurement customer owns the license

---

- Additional upkeep fee for updates, support and resource pages

---

Ask about trial periods. Both license options can be bundled with other Fluidit products.

Let cities thrive
